<sup>3</sup>Universidad Católica del Norte, Chile

<sup>4</sup>Universidade Estadual de Campinas, Brazil.

This volume of *Matemática Contemporânea* is dedicated to the Workshop on Geometric Structures and Moduli Spaces which was held at the Facultad de Matemática, Astronomía, Física y Computación, Universidad Nacional de Córdoba, Argentina during the week August 29-September 2, 2022. This meeting was an activity organized by the members of the project Math AmSud (21-MATH-06), an Argentina-Brazil-Chile-France collaboration on Geometric Structures and Moduli Spaces.

The program of the workshop included 18 plenary talks and 10 short talks by recognized researchers from Latin America and Europe. There was also a poster session for young researchers to share their work with this mathematical community.

We use this opportunity to thank the Universidad Nacional de Córdoba for hosting and supporting the event. We would also like to thank the financial support of the following agencies that made this conference possible: FAMAF, UNC, CONICET, ICTP, UMU, MinCyT, MathAmSud consortium.

The current edition of *Matemática Contemporânea* brings together contributions from both participants in the workshop and colleagues associated with the Math-AmSud collaboration. We are delighted to present

this collection to our community and express our gratitude to all the authors for their dedicated work and patience. Each paper in this volume has undergone a rigorous peer-review process, and we extend our sincere appreciation to the anonymous referees who generously contributed their expertise.
